Foreword

This manual presents the LabBook elements that are accessible to a person with "technician" rights. If you do not have access to any of the actions via your interface, please contact your administrator so that these rights can be assigned to you.

In order for a technician's work to be finalized for LabBook, the analysis result must be recorded and validated. Once this validation is done, the analysis disappears from the technician's interface to be viewed by the biologist for final validation.

Home page

By clicking on the icon next to your name, you have the option to :

- Logout : Allows you to leave the application by closing your account
- Edit user : Allows you to edit your profile information (login, first name, last name, ...)
- Edit password: Here you have the possibility to change your password

This homepage allows you to directly access the results and work lists for your profile.

For the use of the "New Outpatient Request" and "New Inpatient Request" record creation functions, please refer to the Manual for the "Secretary" category.

Emergency management

If you see the logo on your home screen, it means that some files have analyses to be done urgently. By moving the mouse over this logo, the software will indicate the number of analyses

Analyses	urgentes : 3
Urgences	Liste des de

concerned:

By clicking on the icon, you will go directly to a listing that shows you the files concerned. You can then enter your results for these files.

Technician work list

This list shows you the files that require your intervention. It allows you to enter the results file by file. If you prefer to do it Analysis by Analysis, please refer to the chapter "Entering results".

Lab Book	Administrative	Reports	Cuality No.	on-conformity		Thierry T	
				Work list			
Record date greater t	han jj/mm/aaaa		Record date less than	jj/mm/aaaa 🗖	Urgent only		
Record list							Q Search

Results entry			0002 00190	2023-08-04	KJOO4	MANZI	
Technical Valida	ation						

In the "Action" column, you can access several choices:

- "Administrative file": allows you to view the information entered when the file was registered. It also allows you to print an invoice or to reprint a report.
- "Entering the results": allows you to enter the results of analyses for this file.
- "Technical validation": allows the technical validation of the recorded results.

	A O	Concentration (CCMH)	* _ to values entered around
	A O	Leucocytes (LCR)	* mille/mm3
	A O	Polynucléaires neutrophiles	*
	-		

Once you have entered the results, you can click on "Save" for each analysis. This allows you to enter the results in real time.

Créatininuri	e [Biochimie urinaire	e]					
8 08/2023							
A	A			Créatinine		12	mg/24h
Save Validation	on 08/08/2023	Technician	Thierry TECH		Validation		

When a record is made, you can validate your result. Once this validation is done, you will not be able to go back to the result. Only a biologist can reset the result of the analysis.

Once the validation is done, the status of the analysis changes from " A " to " T ".

If a triangle with an exclamation mark appears on the line of a result, it means that the value entered is "out of range". These standards are indicated in your analysis repository. If the warning seems incorrect, you can contact your administrator or your biologist to make the change in the repository.

Technical validation

This item in the list of actions allows you to perform only the technical validation on a file. Thus, the interface that appears shows you only the elements to be validated on the file in question:

Lab Book	Administra			Non conformité		
	Administra	vali	dation technique - LME	31 PNQL1 - Joseph NDC	DNG - Né(e) le 2005-02-20 - 17 années

		୦ Reset 🔍 Search

The page that appears shows the files concerned by analysis family. You can then enter your results, save them and validate them analysis family by analysis family.

You can print the bench sheet by clicking on the "Bench Sheet" button.

Status of current withdrawals

This module allows you to enter the samples taken in the laboratory. To do so, you can go through the icon on your home page or through "Administrative", "Status of specimens in progress".

Lab Book	Administrative	Reports Quality	Non-conformity				US -
		Sta	tus of specimens in progre	SS			
Total number of lines : 17 First Previous 1 Next Last							
Record number	Record date	Patient	Blood	Stool	Urine	Other

This display allows you to quickly see the files in progress. The different existing statuses are the following:

- A: administratively validated (no test results have been entered in the file)
- T: technically validated (results have been entered and validated by the technician. The biologist must validate the results to create the report).
- B: biologically validated (the results were validated. The report could be edited. By clicking on the file, you can see when).
- I: some elements have been validated but not all of the requested analyses.

N.B.: If your file has an "Internal laboratory file number", it is displayed in the file number column

(and after the file number) ⁴⁵⁶ . And you have the date and time the file was received in the "File reception" column.

In the Actions menu, you will find the elements that allow you to act on the file as presented in the technician work list.

Reports

You have access to the tool that presents the standard LabBook reports.

Activity report

This report allows you to have data on Analyses by type of request (Outpatient, Inpatient, On-call and Total) and by age group.

Please note: Age groupings can be customized in the administration interface (with the "root" login).

You have the possibility to export the data by type or by age or to export the whole report in PDF format.

Epidemiological report

This report presents a number of indicators. You have the details of the report in the Epidemiology tab with the disease, the nature of the sample, the total received, the total analysis and the results.

b Book	dministrative	Reports	Quality N	Non-conformity			C
			Epic	demiological report			
Date from 01/07/2023	to 0	8/08/2023				Q Sea	rch
Epidemiology Disease		Type of	specimen	Total received	Total analysed	Results	
Choléra		S	əlles	0	0	Examen direct Bacilles à mobilité polaire : 0 BGN incurvés : 0	
						Culture Négatif : 0 Positif : 0 V. cholerae O1 : 0 V. cholerae O139 : 0	

You can also search for a specific report by entering the date range on the "Search" tab.

And also download the report in PDF format by clicking on the "Download Report" button at the bottom of the page.

Download the report

The epidemiological report can be configured from the "Epidemio Configuration" tab with the administrator and biologist profiles.

Indicators report

The indicator report can be used to customize the data to be displayed on the disease, the nature of the sample, the total received, the analysis total and the results.

It is possible to modify the filter on dates as well as to restrict on a file creator in order to reduce the view by creator.

The outstanding balance is displayed at the bottom of the listing.

Quality and Non-Compliance Module

By clicking on the icon the declaration of a non-conformity is possible for the authorized personnel.

The form that opens allows you to describe the type of non-conformity, its impact on the laboratory and the elements put in place to resolve this non-conformity.

For all other information on these two modules, please refer to the manual on these features.

Advanced Technician

This role was added with LabBook 3.0 to give more privileges to a standard technician account. The difference is in the ability to access the site settings menu and the folder deletion action.

In this menu, the advanced technician can access the following options:

- "Preference" to customize the information of the laboratory: the header of the report, the unit price of the acts of sampling and analysis, the activation of module, the unit of age by default, the time of automatic disconnection, and the possibility of invoicing the hospitalized patients.
- You can use the "User management" button to add, modify or delete a user.
- The "Analysis repository" for the possibility to edit and add an analysis. And also to import/export the repository.
- "Dictionaries" to add, edit in the data dictionary.
- "Age Interval Setup" to change the reporting data by age.
- You can use the "Requesting Services Configuration" button to add a list of requesting services.
- The "Configuration of functional units" allows you to create units in LabBook, assign users and analyses to each unit in order to use a single LabBook for different services and with partitioned data.
- Use the "Patient File Management" button to modify patient files. Merge two patient records.
- DHIS2 and Epidemio configurations to load or download the configuration file
- Finally the configuration of the indicator report to create and add a spreadsheet that allows the management of data to be displayed in the report.
